

"Who moves the Child on Earth"

The Musculoskeletal system in relation to Walking, Speaking, Thinking in the first three years of life.

An exploration with
with *Patries Orange*, Eurythmist
and *Lakshmi Prasanna*, Physician

Lakshmi and Patries have been offering a series of popular workshops over the last 3 years, unlocking the secrets embedded in our human physiology.

We live our own physical reality without much question. All is taken for granted until it becomes a disturbance. In our quest for meaning and direction in our life, the wisdom of our physiology shows us an example of a profound collaboration of cosmic proportions! Anthroposophy gives us a pathway to explore and mobilise experiences through which we can arrive at an understanding of the spiritual nature of the human being.

Patries' and Lakshmi's unique way of collaboration creates an atmosphere of 'action research'. All of us are part of this exploration through the presentations, movement, eurythmy and conversations.

No previous attendance or experience is needed. Each workshop stands on its own. These workshops are appropriate for anyone who is interested in life and its many mysteries!

**On Saturday, 13th May 2017, 10.00am – 4.00pm
and Sunday, 14th May 2017, 9.00am – 2.30pm**

**At Newcastle Waldorf School
