 MedPharm
Scientific Publishers

Enriching and broadening the spectrum of possibilities through integrative medicine is becoming ever more important.

Twelve years after its first publication in German this classic work of anthroposophic and homoeopathic paediatrics is appearing as a completely revised 4th edition in its first-ever English translation.

This book is based on the internationally recognized system and concepts of modern paediatrics and aims to offer doctors ways of augmenting their therapeutic repertoire.

It includes:

- Integrative ways of comprehending modern medical and physiological data.
- Inspiration and support for practicing individualized paediatrics.
- Background information on homoeopathy and anthroposophic medicine and their application in integrative paediatrics.
- Clear medication recommendations with information on dosages.
